PROFESSIONAL SUMMARY

A Software Engineer with **2+ years** of experience in fast-paced startup environments, delivering production-grade full-stack web apps and AI-powered solutions. Proven track record in building CRM platforms, workflow automation systems, and scalable architectures. Proficient in the **MERN stack**, with a strong understanding of software design patterns, clean code principles, and production deployments. Experienced in collaborating with cross-functional teams to deliver high-impact product features.

PROFESSIONAL EXPERIENCE

Software Developer (SDE-I)   Oct 2023 – Present | Kolkata, India
Brand Exponents Creatives Pvt Ltd

- Played a key role in the development and enhancement of **Swipe Pages**, a no-code landing page builder, contributing to core features like **Workflow Builder** and **Genie AI** personalization tool.
- Contributed to the development of **Swipe One**, an AI-powered CRM and marketing automation platform, from the ground up.
- Collaborated on the development of core features for Swipe One's successful launch, including the **AI Agent**, **Workflow Builder**, and **analytics dashboards**.
- Served in a full-stack role by collaborating with cross-functional teams across frontend, backend, and AI-driven systems to ensure seamless integration and successful delivery of production features.

Frontend Developer   Jun 2023 – Aug 2023 | Kolkata, India
Nexus Software Solutions

- Developed and implemented responsive user interfaces using **React.js** and **JavaScript**, ensuring a seamless user experience across various devices.
- Collaborated with cross-functional teams to build a real-time chat application, utilizing **WebSockets** for live communication and data exchange.
- Contributed to the development of multiple web projects, including an event booking system, by applying responsive web design principles.
